

# Interior Cleaning Directions – 2ozs per Gallon of Water

## If the Surface is Washable – You Can Use SporiCLEAN®

**Dilution:** There are 2-dilutions for cleaning: 2-ounces per gallon of water and 4-ounces per gallon of water. All general purpose indoor cleaning uses 2-ounces per gallon of water. All outdoor cleaning and FLOOD WATER or MOLD cleaning uses 4-ounces per gallon of water.

**FABRIC STAINS:** Use the 2-ounce mixture and spray into stained area and rub gently between fingers and allow to air dry. When you do your next load of laundry, simply re-spray this area (if stain is still visible) and wash laundry as normal.

All Washable Kitchen Surfaces and Appliances (inside & out)

### DILUTION: 2-ounces per Gallon of water

1. Spray or sponge solution over all soiled areas
2. Gently scrub solution into all surface areas (cracks & crevices)
3. Allow solution to penetrate on the surface for 5 minutes
4. Rinse off or wipe clean with a damp Microfiber Towel or cleaning towels and clean water
5. Repeat if necessary

All Washable Bathroom Surfaces

### DILUTION: 2-ounces per Gallon of water

1. Spray or sponge dilution over all soiled areas
2. Gently scrub solution into all surface areas (cracks & crevices)
3. Allow solution to penetrate on the surface for 5 minutes
4. Rinse off or wipe clean with a damp Microfiber Towel or cleaning towels and clean water
5. Repeat if necessary

Carpet Shampoos and Extractors

### DILUTION: 2-ounces per Gallon of water

1. Pour dilution directly into shampooer or extractor reservoir
2. Gently agitate SporiCLEAN solution into the surface
3. Allow SporiCLEAN to sit on the surface for 5 minutes
4. Rinse off or wipe clean with a damp Microfiber Towel or cleaning towels
5. Repeat if necessary

Washing Machines – Laundry

**NOTE: Fill with water first...  
Then add clothes!**

### DILUTION: 1-2 ounces per wash load – No Detergents Necessary! (Added savings to your household)

1. Pour 1-2 ounces directly into wash water – **then add clothes!**
2. Wash normally without adding bleach or detergents!
3. For fabric stains, spray 2-ounce general purpose dilution directly into stained area and gently brush or rub between fingers.
4. Allow to dry and wash with regular wash load.
5. Repeat if necessary
6. **FRONT-END LOADERS:** Mix dilution into quart bottle and pour directly into machine. Helps keep mildew and mold off seals.

# Exterior Cleaning Directions – 4ozs per Gallon of Water

If the surface is washable – you can use SporiCLEAN®

Vinyl & Aluminum Siding

**DILUTION: 4-ounces per gallon of water (use a hand-pump garden sprayer)**

1. Spray or sponge solution over all soiled areas
2. Gently scrub solution into all surface areas (cracks & crevices)
3. Allow solution to penetrate on the surface for 5 minutes
4. Rinse off with garden hose or wipe clean with a damp Microfiber Towel or cleaning towels and clean water
5. Repeat if necessary

Hot Tubs & Spas all contain high-levels of bacteria and organic debris!

**DILUTION: 1-ounce per 5-gallons of water**

1. Fill water level to 2" above highest jet nozzle
2. Add appropriate amount of SporiCLEAN concentrate to water and turn on jets for 15-minutes (1-quart should do most spas)
3. Turn off jets for 5-minutes and allow enzymes to dislodge and break-down bacteria and organic matter
4. Turn on jets again for 15-minutes and then drain system completely. Refill to desired water level and use.
5. Repeat is necessary or clean every 6 to 9 months depending on frequency of use and number of people per use.

Patios, decks & fencing  
All washable surfaces

Provides a good residual for a full season or longer.

**DILUTION: 4-ounces per gallon of water (use a hand-pump garden sprayer)**

1. Hand-Pump Spray solution over all soiled areas first
2. Gently scrub solution into all surface areas (cracks & crevices) with a long handled medium bristled telescopic brush
3. Allow solution to penetrate on the surface for 5 minutes
4. Rinse off with garden hose or power-washer. If power-washer has a siphon hose, you can pour SporiCLEAN concentrate directly into reservoir and power-wash as usual.
5. Repeat if necessary

Contaminated Floodwater Cleanup - Always wear the proper personal protective equipment!

**DILUTION: 4-ounces per gallon of water (use a hand-pump garden sprayer) Wear Facemask, Goggles, Gloves**

1. Hand-Pump Spray solution over all flood contaminated areas
2. Scrub (brush) solution into all contaminated surface areas (cracks & crevices). Spray a second time to insure total coverage and decontamination occurs.
3. Allow solution to penetrate into surface for 15-minutes
4. Rinse off with hose or power-washer. If power-washer has a siphon hose, you can pour SporiCLEAN concentrate directly into reservoir and power-wash as usual.
5. Repeat if necessary.
